

### Abstract of the Disclosure

5           Apparatus for the production of extruded blown cellulose film from a solution of  
cellulose, water and an amine-oxide, which includes: - extrusion apparatus for continuously  
extruding a cellulose solution to produce a cellulose film; - solidifying apparatus for solidifying  
the extruded cellulose film; - drawing apparatus positioned downstream of the extrusion  
apparatus for continuously drawing the extruded cellulose film from the extrusion apparatus; and  
10   a tubular member for containing precipitation apparatus and for receiving an extruded blown  
film wherein the tubular member is situated within a precipitation bath. The invention also  
includes a method of extruding blown film .
